# HOUSING FOR ALL

People all over the United States face the prospect of living on the streets -- individuals, whole families, even children, and veterans who have returned from American wars. Banks are foreclosing on homeowners. Even those with steady jobs could be one paycheck away from becoming unhoused. The ruling class refuses to give workers the housing they need, though empty homes and apartments abound. Organizers from Chicago, San Francisco, Las Vegas, and Michigan will share experiences in the various struggles to provide **HOUSING FOR ALL**, as a human right. Come join the conversation!!!
